

Home page:

1. The logo in the nav is wrong. And the brand name font is wrong
2. The secondary button font colour is wrong. This is the Login button or the homepage hero "deploy metabase open source" buttons.
3. In the section below the hero where the graphs are shown there is a column called chat with metabot. The questions and answers are wrong here.
4. The "Payments received per quarter by plan" graph has styling issues. The bars and the numbers on the axis seems to be stretched.
5. The "watch a 1-min demo" pill graph and the circle image of the man is placed wrong. They should be aligned to the bottom and overflow hidden. There is a hover animation for the circle man image too
6. In the "Deploy in minutes, scale infinitely" section, the card with the services logos that auto slides should keep auto sliding even when mouse hover. And the when hovering the circle seems to get cutoff a bit maybe cus of an overflow hidden.
7. In the next section the "Business Intelligence" font colour is wrong. This seems to be aligned with the secondary button font colour issue
8. In the "Analytics your team will use and trust" section, the demo card has some more data in the original site. And when it keeps showing answers that part becomes scrollable too
9. In the "Share reports and create custom insights" card the mouse pointer is wrong. And the data in the "dashboard" is wrong too. The graph doesnt match the design too
10. In the "Put production-grade analytics into your app without drama" section, there is a draggable window. Right now its dragabale through the page. But in the original it is draggable around the dashboard image only. Check with the bounding box

/product/business-intelligence

1. The icon of the hero eyebrow is wrong
2. The hero heading font styling is wrong
3. The icons for "Free 14-day trial, Super-fast setup and Open source are wrong
4. The image of the dashboard is too blurry
5. The hero seems to have a background image of a pattern too
6. The icons of the three cards are wrong too
7. The "You could be querying 5 minutes from now" section layout and text stylings and list stylings are all wrong
8. The "Avoid repeated requests with reports anyone can run" section cards has a scroll animation.
9. The stylings of the next section is all wrong too
10. The section above the footer has a slight fade off sort of thing to blend the end of the section with the footer

/product/embedded-analytics

1. Hero icons in the eyebrow and heading fonts are wrong
2. The spacing between the image and the logo elements are wrong
3. And overall the stylings does not match the sections from the original
4. "Easy to use for all types of customers" section tabs has a auto changing feature. The border below the tab fills and when it completely fills it switch to the next tab. The styling here is all wrong too.
5. "Works with your stack for live visualizations and reports, not extracts" the card icons are wrong
6. Every section in this page has styling issues.
